

# AMY MARKS

Leader.  
Innovator.  
Change Maker.

As CEO of XSite Modular, Ms. Marks has become the preeminent prefabrication consultant and design-builder of Critical Infrastructure Buildings, worldwide. As the CLS and modular data center business has exploded, Ms. Marks has been at the forefront of this evolution and is a pioneer in the shaping and advancement of the Modular CLS industry – and is an expert in other critical infrastructure building types across the terrestrial infrastructure space including data centers.

Ms. Marks is committed to using her extensive experience, thought leadership and high profile within the subsea space to promote participation, innovation and advancement across all industry segments while bringing critical attention to attracting a diverse talent pool while educating about inclusion issues as a means to bring new perspectives and skill sets into the industry.

- SubOptic - Roundtable Discussion Leader
- CAPRE – 5G Panelist
- Submarine Networks Singapore – Chair of the Data Center and Cable Landing Station Track

## Diversity & Inclusion

A stalwart advocate for diversity and inclusion issues within the subsea community, Ms. Marks is a founder of the Women in Subsea. She is passionate about fostering innovation and attracting diverse talent within the Submarine Cable industry. Working through SubOptic she has recruited a team for the working group that strives to advance and promote cultural and ethnic equality, respecting and valuing differences, including (but not limited to) age, gender, ethnicity, religion and sexual orientation.
